class='spacer'> qinstall for Slackware 11.0 released Announcing <strong
class='bbcode'>qinstall for Slackware Linux 11.0

  qinstall is a package collection along
with a powerful installer for Slackware Linux.
It helps administrators to install and run an out-of-the box powerful, secure, scalable and reliable Qmail based e-mail
server, along with all the programs required by it so that it will run properly. The final result being a functional full featured, secure and reliable e-mail server, in
just a few minutes !

qinstall's core features include:
- Antivirus
- Spam filtering
- Rule-based email filtering
- Virtual Users (no system
accounts)
- Virtual Domains
- Auto Responder
- Both Web and Console-based Administration Tools

Basically everything a e-mail server should include,
in one easy to install package.
